AERIA

STAGES 7-10 UPDATE AND START OF NIGHT WORKS

Stages 7–10 of the Tower Road/Link Road upgrade commenced on 20 November 2023, as part of a major project to improve safety, accessibility and amenity for drivers and pedestrians.

Those works require the intermittent partial closure of the southern section of Tower Road, between the intersections of Murray Jones Drive and Rabaul Road.

To minimise inconvenience and the impacts of such closures on road users, we are moving key elements of the construction from daytime to night time.

Night works are scheduled to start on Sunday 26 November 2023, reducing the need for traffic management controls during school and business hours and enabling better access for our customers and the community.

To ensure safety, the southern section of Tower Road will be accessible to airport precinct customers and emergency services only during night works between 7pm and 6am. Night works will continue through December.

THE WORKS

Stages 7-10 works on the southern section of Tower Road are expected to run for approximately three months overall, weather dependent.

The works include:

- Installation of stormwater and electrical infrastructure
- Carpark works
- Road pavement upgrades
- Installation of kerbs and a shared footpath and cycleway

Night works are expected to run from 26 November 2023 through the remainder of the year.

Further pavement upgrades are expected in this area over January and February 2024. Traffic management measures will be in place to ensure safety for workers and road users.

POTENTIAL IMPACTS AND MITIGATION MEASURES

To ensure safety, the southern section of Tower Road will be open to airport precinct customers and emergency services only during the period of night works, from 7pm to 6am.

Traffic barriers will be in place to restrict access to other road users during the night works. The southern section of Tower Road will reopen to all road users each day at approximately 6am.

The northern section of Tower Road, from the Rabaul Road intersection, and Link Road are unaffected by these closures.

While we are working hard to minimise any inconvenience related to this significant road upgrade, please allow for extra travel time and use alternative routes where possible.

We thank you for your patience and cooperation in helping us create a safer, more accessible and enjoyable airport precinct for everyone.

ROAD ACCESS FOR CUSTOMERS AND EMERGENCY SERVICES

Airport precinct customers and emergency services will retain access to Tower Road at all times. Construction staff will be on hand to assist as required.

If there are any concerns or queries regarding such access, please use the contact details below or contact your AMG Property Team representative.

Emergency services will retain priority access to Tower Road at all times.
