

Camden Airport Car Park and Stormwater Upgrades Construction Start Notice

As you may have seen, the Contractor has commenced works this week to upgrade the car park and stormwater infrastructure at Camden Airport, as well as enhancements to airside aprons and taxiways.

These early works include setting up a temporary site office and fencing and starting the construction of a temporary driveway diversion to enter and exit the car park.

The main construction works will commence in November 2023 and are expected to run through to March 2024. Those works include:

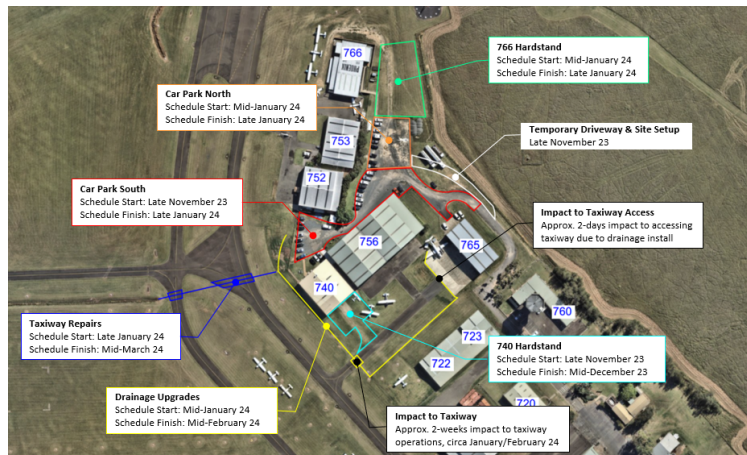

- Upgrades of the major stormwater system to improve water drainage away from operating areas and to reduce the impact of flooding.
- Reconstruction and resurfacing of the airport car park.
- Upgrade of the car park access road
- Widening of taxiway to improve safety for turning aircraft.

Revised Staging of Works

The expected commencement of the main construction works in late November 2023 is later than the original proposal of October 2023. This delay was due, in part, to additional requests for information about the works by the authorised authority.

The staging of the works has been revised accordingly. See the revised staging map below for more information. Construction works to commence in 2023 include:

- Reconstruction of car park south. The car park works will be separated into two areas/stages, south and north, to ensure parking is always available for airport users. Car park north works will start in early 2024 to minimise operational impacts over the Christmas period.
- Reconstruction of hangar 740 hardstand.

Project Updates

We will provide regular updates during the works, via email and our website: aeria.co

For any queries, please contact us via info@aeria.co.

We appreciate your cooperation and patience while we complete this important and necessary work to improve the safety and conditions of Camden Airport.
