Camden Airport Carpark and Stormwater Upgrades Reopening of Taxiway Charlie

Our major upgrade to airside stormwater infrastructure at Camden Airport is progressing well, including the reopening of Taxiway Charlie today, as scheduled (further details below).

Taxiway Delta and the apron to the taxiway from hangars 740, 756, 765, 723 and 722 reopened in full earlier than planned, in late February, despite the impacts of recent poor weather.

We expect to complete the upgrade works, which are pictured below, by end April / early May 2024.

Reopening of Taxiway Charlie and upcoming minor works

We are pleased to advise that Taxiway Charlie reopened in full at 3pm today, Monday 25 March, as scheduled.

While the main works to Taxiway Charlie have been completed, we will need to briefly close the taxiway for an additional day in the next weeks, for minor works. We will advise you shortly of the date of these works.

We appreciate your cooperation and patience while we complete this important and necessary work to improve the safety and conditions of Camden Airport.

For any queries, please contact your AMG Property Manager or Senior Communications & Stakeholder Engagement Manager Peter Munro (peter.munro@aeria.co).
